PROFILE

I'm a consultant and founder with a control-theory engineering foundation. After nearly a decade at MathWorks – from application engineer to Business Development Manager for global Academic strategy – I co-founded VersionBay, running it alongside a stint as Country Manager Benelux at Open iT and the MATLAB Coders hobby project.

AT A GLANCE

20+ years in engineering, consulting & entrepreneurship
1 company founded – VersionBay
6+ years chairing PyData Eindhoven
4 languages spoken
